

Offshore Wind Energy

- Science meets industry

2. April 2014, 10:00 - 15:30
Måltidets Hus, Ullandhaug

The purpose of the seminar is to strengthen the contact between research and industry; to give insight into ongoing research and to present industry projects, experiences and challenges.

*Arranged by Arena NOW, NORCOWE and Greater Stavanger.
Please visit www.norcowe.no for more information.*

Presentations

Building an Offshore Wind Industry in Norway. Siragrunnen and Havsul leading the way forward.

Harald Dirdal, Havgul

Experiences from offshore wind installations in the North Sea

Maria Pedrosa, StormGeo Aberdeen office

Operations and maintenance management for large scale offshore wind parks

Ole-Erik Vestøl Endrerud, University of Stavanger

Access systems for offshore wind

Svein Ove Haugen, UPTIME International

Metocean Instrumentation Systems for Offshore Wind

Jon Arne Silgjerd, Automasjon og Data

Lunch

LiDAR measurement campaign Sola

Valerie Kumer, University of Bergen

Hywind Scotland, status and further plans

Torgeir Nakken, Statoil

Breaking wave induced vibration of a monopile supported offshore wind turbine

Arun Sarkar, Subsea 7

Effect of large wind turbine rotor on a monopile foundation

Lene Eliassen, NTNU/Statkraft

GWIND – vertical axis turbine tests in Stavanger Harbour

Simen Malmin, Prekubator

Posters

15:45-17:15 Visit to GWIND in Stavanger Harbour
